

# REMOTE TERMINAL AND CONTROL **RTU-LC**

*A Simple Solution for Today's Control and Communication Technologies.*

Many manufactures and engineering firms boosted their supervisory control and data acquisition to the highly advanced level using expensive third party software. Now **NWTC** offers a simple and user-friendly costless remote control system to support the small and mid-size users for their control application including data acquisition.

## **FEATURES:**

- No high cost third party software
- Custom design for your need
- Remote control and graphic via PC
- Real time screen builder Up to 40GB memory for data logger
- Powerful I/O with analog card expansion
- Window 2000 operating system

## **Hardware Configuration:**

Basic: 8 Input / 6 Output expandible up to 32 points and 8 analog input

**IDEAL FOR INVENTORY CONTROL**

## **Communication**

- \* Telephone line
- \* Internet
- \* Ethernet
- \* Radio modem
- \* Cellular phone

## **Applications**

- \* Residential & commercial waste water systems
- \* Remote inventory control
- \* Property monitoring from anywhere
- \* Temperature & heating remote monitoring
- \* Fuel level monitoring
- \* Many other types of applications
