

# MINI MOUSE

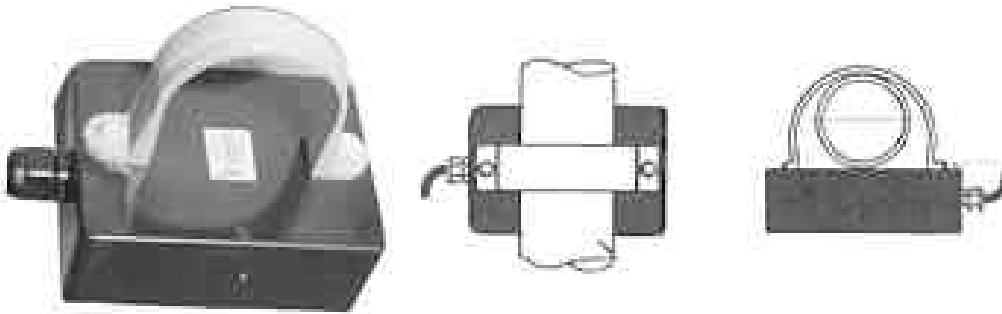

**NTS**  
2500

## External Adjustable Level Sensor

Northwest Tech-Con System's NTS 2500 - Mini Mouse III is designed to be externally mounted on 2" clear PVC pipes and moved vertically within the pipe stem to set desired level. On passing a preset level, the magnetic sensor float (moving vertically inside the stem) starts, stops and switches high or low level alarms via the NWTC low voltage controller.

### FEATURES:

- Easy to install
- Easily change level settings
- Weather proof sensor
- Low voltage operation
- Level sensor compatible with all NWTC low voltage controller
- Pump up or pump down application
